# Gradescope Guide

CS1570

Set Up

For setting up and linking your gradescope account, you can follow one of two methods: A) using your Brown email or B) Using an anonymous email. For both options we will ensure anonymity in the grading process.

A. Using Your Brown Email

1. Please go to https://www.gradescope.com/ to sign in or sign up for a Gradescope account. Please sign in using your **BROWN EMAIL** address.
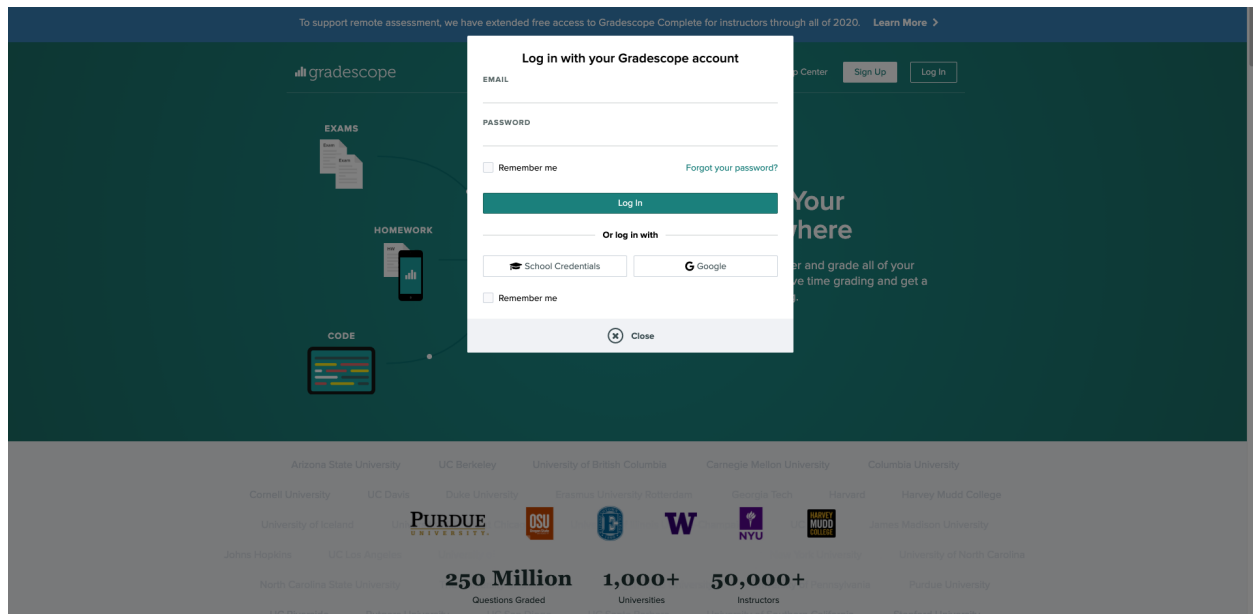

2. In order to facilitate anonymous grading, we ask that you edit your name into an anonymous string, feel free to use something like https://www.random.org/strings/ to generate a random string (reminder, make sure the email contains your name so we can keep track of who you are)

3. Add the course through the course code: D5G63D0
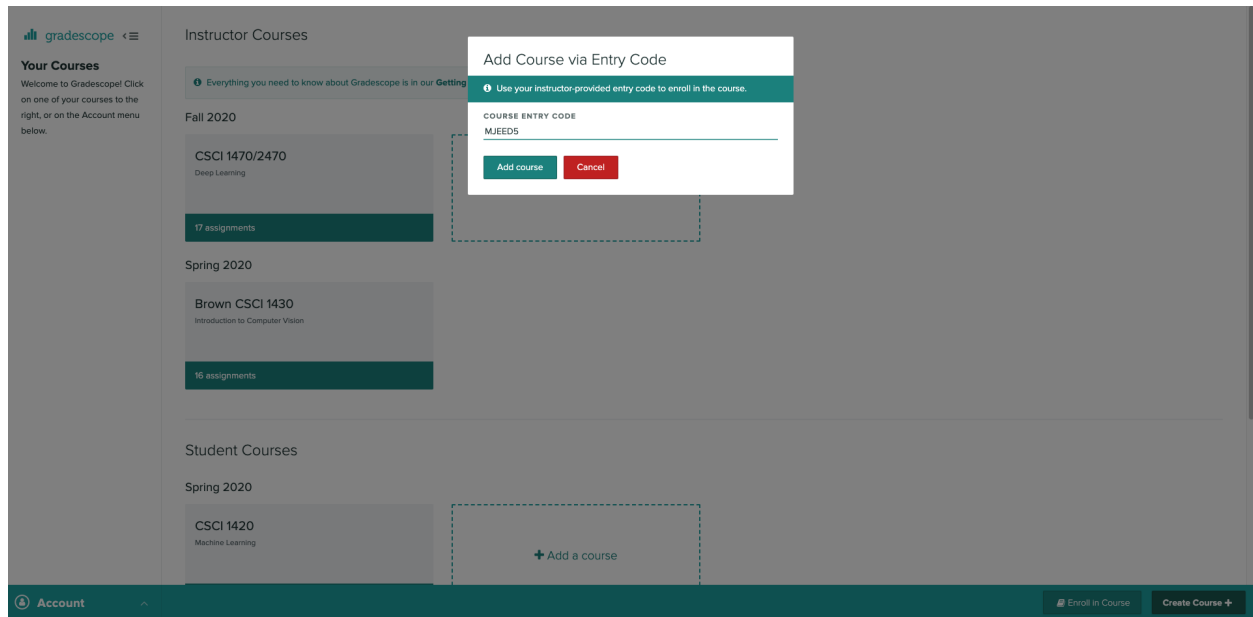

B. Using An Anonymous Email

If you already have a Gradescope account <u>with an anonymous email address</u> (such as from cs0220), you are welcome to reuse it. Just be sure to enroll in cs1570 on Gradescope and **submit this [form](#)** to tell us what your email is.

If you do not already have a Gradescope account with an anonymous email address, follow these steps:

Email Creation

First, create an anonymous ID using [this link](#). Now, you'll need to create a new email address with this ID as the username. This will make you anonymous to graders on Gradescope. To do this, carefully walk through the following steps. We recommend using an incognito window for this.

1. Navigate to www.gmail.com.
2. Make sure you are logged out of any other account and click "Create account" at the bottom.
3. Fill out relevant details, and include your ID from above as the username. That is, your account should be <your anonymous ID here>@gmail.com.
4. If the account is already taken, generate a new anonymous ID and repeat the steps above.
5. If prompted, enter a valid phone number to verify your account.
6. Finish filling out the requested details and click "Next".

Email Forwarding

You can set up email forwarding so that you don't need to ever check this inbox. To do this, follow these steps (starting from your **new** Gmail inbox):

1. Go into your inbox settings by clicking on the gear symbol in the upper-right of your inbox and then clicking on "Settings".
2. Navigate to the "Forwarding and POP/IMAP" tab.
3. Click on "Add a forwarding address" at the top and choose an email of your choice.
4. Go into that email inbox and copy the confirmation code to verify.
5. Select the "Forward a copy..." radio button, and then click "Save changes" at the bottom.

Gradescope Account Setup

Here we will go through the steps of creating a Gradescope account and enrolling in our course. Even if you have used Gradescope before with your @brown.edu email, you need to create a new account for this class with your anonymous ID and email address. Again, if you already have a Gradescope account **with an anonymous email**, you can reuse it.

1. Navigate to www.gradescope.com.
2. Click "Sign Up" in the top right and sign up as a student.
3. For the course entry code, write **D5G63D0**.
4. For the remaining fields enter your anonymous ID, email address, and anonymous ID respectively. **Your name should not appear anywhere in your account information.**
5. Once you submit, your account is created, and you're enrolled!
6. **Submit this [form](#)** so that we can link your Gradescope account to your identity when we assign final grades!

Keep track of your ID as you will need it to sign in to your Gradescope account! You will be given a copy of your response to the form so you will always have your ID.

Regrade Requests

Please submit all regrade requests through Gradescope, there should be a button at the end of the submission allowing you to request a regrade

Acknowledgement
